

Developing Thinking Strategies for Addition/Subtraction and Multiplication/Division

MCTM Duluth 2019

NUMBER FACT STRATEGIES

ADDITION

- Count-on 1, 2 and 0
- Doubles and near doubles
- Make ten

SUBTRACTION

- Think addition

MULTIPLICATION

- Use tens (5s)
- Make generalizations (1s and 0s)
- Use doubles (2s, 4s and 8s)
- Build up/down (9s and 6s)

DIVISION

- Think multiplication

TEACHING SEQUENCE

- Introduce (see page 2)
- Reinforce (see page 2)
- Practice (see page 3)
- Extend (see page 3)

The Introduce Stage

This stage involves the use of concrete materials and pictorial representations to model the strategy.

At this first stage, ORIGO resources also include **contextual situations** to provide meaning.

The Reinforce Stage

This stage provides the opportunity for the students to assimilate and internalize the strategy.

It is an additional link using pictorial models between the introductory work and the symbolic.

The Practice Stage

This stage aims to develop accuracy and increase 'speed' of recall.

In this stage, a range of different types of written and oral activities is used.

The Extend Stage

This stage moves the strategy to examples beyond the number fact range, including computation with decimals.

INTRODUCE: Make Ten

REINFORCE: Make Ten

- Roll your number cubes and write the fact below the example in the grid that will help you figure out the answer.
- Write the answer to both facts.

$10 + 6 = \underline{\quad}$ $\underline{\quad} + \underline{\quad} = \underline{\quad}$
$10 + 5 = \underline{\quad}$ $\underline{\quad} + \underline{\quad} = \underline{\quad}$

IDEAL RESOURCES TO TEACH AND REINFORCE BASIC FACTS

The **Box of Facts** kits contain more than 200 laminated cards for the basic addition/subtraction and multiplication/division facts.

The **Book of Facts** teacher guides provide a comprehensive bank of activities and engaging blackline masters for each step of ORIGO's four-stage approach to number fact fluency.
